

In Appreciation

This issue concludes the 33rd volume of the *Journal of Neuropsychiatry and Clinical Neurosciences*. The high quality of the neuropsychiatric scholarship in this volume reflects the exceptional contributions of our authors as well as the extraordinary efforts of the team of talented and dedicated professionals supporting the Journal. We appreciate the counsel and contributions of our Consulting Editors, Section Editors, and Editorial Board members, whose names are listed on the masthead of every issue. We thank, in particular, Michael Roy, Editorial Director; Demarie Jackson, Managing Editor; Angela Moore, Editorial Manager; Heidi Koch-Bubel, Editorial Support Services Manager; Susan Westrate, Production Manager; John McDuffie, Publisher; and the team of outstanding staff members of American Psychiatric Association Publishing. We are grateful for the visionary leadership, loyalty, and contributions of the Officers and members of the American Neuropsychiatric Association (ANPA), and it is our privilege to continue supporting ANPA's mission, vision, and strategic goals through publication of the *Journal of Neuropsychiatry and Clinical Neurosciences* as the Association's official journal. Our reviewers' contributions enable us to maintain the high scientific and editorial standards for which our journal is known and to publish articles that substantively advance our field and usefully inform the care of persons with neuropsychiatric disorders. In appreciation, we recognize here by name our colleagues who participated in this process over the last year. – D.B.A. and C.A.A.
